**DETAILED ACTION**

***Specification***

1. The disclosure is objected to because of the following informalities:  
The U.S Serial No. of continuation-In-Part in page 1 of specification is missing  
Appropriate correction is required.

***Oath/Declaration***

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.  
The oath or declaration is defective because the priority paper is not identified.

***Priority***

3. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior applications in the first sentence of the specification or in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)).

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that Form the basis for the rejections under this section made in this Office action:  
A person shall be entitled to a patent unless –  
(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.  
Claims 1-5,8-10,15,16 are rejected under 35 U.S.C. 102(b) as being anticipated  
By **Cognetti 5,629,574.**

**Cognetti '574** discloses an electric motor with control device comprising;

A motor housing (M), a bulge formed on the side of the motor housing and

A capacitor assembly including a printed circuit board (9) and at least

One capacitor (3), said capacitor assembly housed in the bulge (Fig.!), the

Capacitor assembly slideably insert into the bulge, the bulge comprises a

Plurality of channels located inside surface of said bulge, the capacitor printed

Circuit board comprising a plurality of longitudinal edges and at least one

Capacitor mounted on said PCB, the longitudinal edges of the capacitor PCB are

Slide ably insert in the channels,

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all  
Obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6,7,11-14,17-19 are rejected under 35 U.S.C. 103(a) as being

Unpatentable over

**Cognetti '574** and in view of **Gillett 4,499,523**.

**Cognetti '574** teaches all limitation of the claim except, a PCB having stiffeners attached to the edges of the PCB and have a tapered shape.

**Gillett'523** teaches a PCB with plurality of stiffeners attached to the edges of the capacitor PCB and have a tapered shape (70, 76 Fig. 7).

Art Unit: 2834

Therefore it would have been obvious to one having skill in the art at the time the invention was made to combine **Cognetti '574** capacitor PCB with the tapered shape stiffeners taught by **Gillett'523** to secure the capacitor PCB in the selected position.
